One Motion™ System Overview

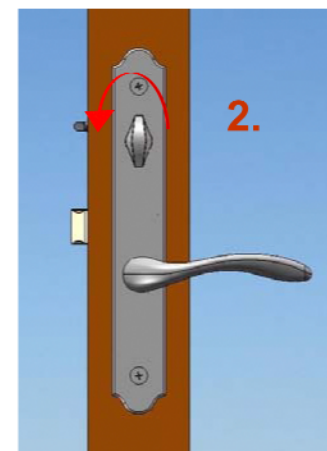

1. Single Upward Motion

- One upward motion of the handle engages all locking points

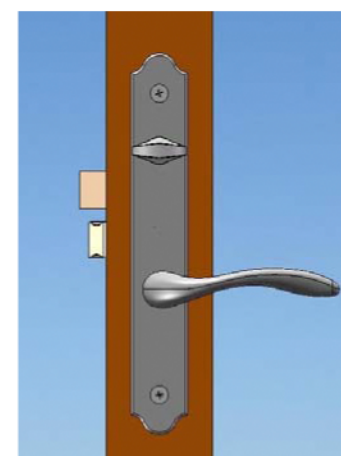

2. 90° Deadbolt Turn

- Intuitive user friendly lock and unlock thumb turn
- Vertical position indicates door is unlocked
- Horizontal position indicates door is locked

3. Auto-Unlock from Inside

- No deadbolt turning is required to exit a locked door
- With one downward motion all locking points are unlocked and latch is retracted from the inside

One Motion™ Features Cont.

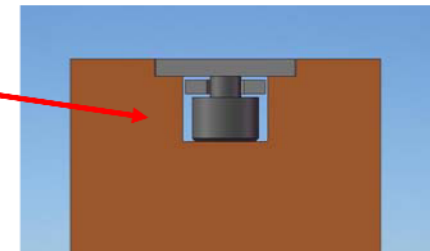

Hook Design

- 2-dimensional closing force
 - pulls the panel closed
 - interlocks the panel to the jam
- Hooks sequentially pull the panel closed
- Two hooks are available above the handle for 8'+ doors
- Positive engagement with strikes

Screw Supports

- Located within the Euro Groove
- Prevents the faceplate and drive rail from bending during installation
- Assures smooth operation
